PROFESSIONAL SUMMARY

Software Engineer focused on Java, Spring Boot, and distributed backend systems, with hands-on experience building payment orchestration, trading, and observability platforms. Strong foundation in REST APIs, microservices, PostgreSQL, Kafka, Redis, and Spring Security, with additional exposure to Generative AI and enterprise observability tooling. Targeting Software Engineer / Java Backend roles at fintech and product-based companies.

TECHNICAL SKILLS

- **Languages:** Java, SQL, Python, JavaScript
- **Backend:** Spring Boot, Spring Security, Spring Cloud, Spring Data JPA, Hibernate, FastAPI, REST APIs
- **Distributed Systems:** Microservices, API Gateway, Service Discovery, Apache Kafka, OpenFeign, Resilience4j, Event-Driven Architecture
- **Databases & Caching:** PostgreSQL, MySQL, Redis
- **Security:** JWT, Role-Based Access Control, Authentication, Authorization
- **Tools:** Git, GitHub, Docker, Maven, Postman, Linux, IntelliJ IDEA
- **Testing & Concepts:** JUnit 5, Mockito, OOP, SOLID Principles, Design Patterns, MVC, Data Structures & Algorithms

PROJECTS

ENTERPRISE PAYMENT ORCHESTRATION PLATFORM

[repo link](#)

Java 21 | Spring Boot 3 | Spring Cloud | React/TypeScript | PostgreSQL | Docker | JWT

- Architected a microservices payment platform (Auth, User, Payment, Wallet, Card, Loan, Notification services) behind a Spring Cloud API Gateway with Eureka service discovery, paired with a React/TypeScript (Vite, Tailwind CSS) frontend dashboard.
- Implemented stateless JWT authentication with Spring Security and role-based access control, with BCrypt password encryption and centralized token validation enforced at the gateway.
- Built payment lifecycle workflows – payment processing, retry handling, wallet transfers, refunds, and fraud-monitoring alerts – backed by a PostgreSQL data layer and validated via Postman and Swagger/OpenAPI testing.

ENTERPRISE INVESTMENT & PORTFOLIO MANAGEMENT SYSTEM (OMS)

[repo link](#)

Java 21 | Spring Boot 3.2 | Spring Cloud | Python 3.11/FastAPI | Kafka | Redis | PostgreSQL | JWT | Docker

- Architected a polyglot, event-driven Order Management System for equities trading, combining a Java 21/Spring Boot order execution engine with a Python/FastAPI risk analytics service, connected end-to-end through Apache Kafka.
- Built an order-routing and trade execution workflow with live bid/ask depth, publishing matched trades to a Kafka-audited, schema-enforced execution ledger for reliable transaction tracking.
- Implemented a FastAPI risk engine using NumPy/SciPy for Monte Carlo Value-at-Risk simulations, Sharpe/Sortino ratios, and portfolio beta, with threshold-based risk alerts secured end-to-end via JWT authentication.

NEXUS OPS – ENTERPRISE OBSERVABILITY & INCIDENT INTELLIGENCE

[repo link](#)

Java | Spring Boot | Spring Cloud | Microservices | Docker | REST APIs | Observability

- Architected a modular observability platform with Spring Boot microservices, an API Gateway, and service discovery for application telemetry.
- Built dashboards for logs, metrics, distributed traces, and incident lifecycle management, with SLA and MTTR reporting.
- Implemented AI-assisted incident intelligence — anomaly detection, root-cause diagnosis, and remediation suggestions — demonstrated via simulated telemetry.

ACHIEVEMENTS

- Designed and implemented **45+ REST API endpoints** across backend applications using Java, Spring Boot, and PostgreSQL.
- Co-authored a **technical research paper** on LiteWing, a gesture-controlled drone system built with ESP32-S3 and MPU6050 sensors.
- Solved **200+ Data Structures & Algorithms** problems across LeetCode and GeeksforGeeks, covering Trees, Graphs, Dynamic Programming, and Binary Search.

CERTIFICATIONS

- **Oracle** – Generative AI Certification
- **JPMorgan Chase & Co.** – Software Engineering Virtual Experience Program (Forage)

EDUCATION

B.E. in Electronics & Telecommunication Engineering

Atharva College of Engineering, University of Mumbai

2022 – 2026

CGPA: 7.25
